

FIRE HYDRANT MAINTENANCE

Routine maintenance and flushing of the Estate's fire hydrants will be carried out over the next three weeks. During this period, residents may notice some temporary changes in the appearance of their tap water due to increased air in the water (a slight discolouration or milky appearance). This is normal and the water remains completely safe for consumption.

JACK NICKLAUS BOULEVARD RESURFACING

Resurfacing of the sections of Jack Nicklaus Boulevard damaged by the recent flooding will commence shortly. A stop-and-go system for traffic control will be implemented, and drivers are requested to exercise caution and drive slowly through the affected area.

WATERCOURSE REHABILITATION

In June, the watercourse between Pearl Valley and the La Vue precinct of Val de Vie had to be deepened urgently in order to handle the increased volume of water resulting from the extreme rainfall and to protect nearby homes from possible flooding. The HOA has been informed that Val de Vie has scheduled a rehabilitation upgrade for the area, which will begin soon.

BOOKINGS FOR THE NEW SPORTS FACILITIES

The HOA is aware that the booking functionality on the Val de Vie App for the new Pearl Valley sports facilities was inadvertently opened at the beginning of the month, allowing residents to make bookings to use the facilities. This was a little bit premature and we apologise for any inconvenience! Details on the opening of the facility and booking procedures will be communicated soon.

CS BLOKINETICISTS

Relative Energy Deficiency in Sports (RED-S) Syndrome

This condition is exacerbated by low bone mineral density, irregular menstrual cycles, and under-fueling (also known as undereating). In other words, when a woman does not eat enough food and nutrients to replace what she expends through exertion, a domino effect occurs that disturbs the equilibrium of her body's systems.

If left untreated over an extended period of time, this combination of circumstances may cause a decrease in bone density, increasing the risk of stress fractures in women. The good news is that early detection can prevent this and other potentially fatal health issues.

For more information or to make an appointment, please feel free to contact them via email at csbiokineticists@gmail.com or give them a call at 076 408 7608.
